Searchlight Activity in the Gulf of Finland

- 5. A searchlight was seen just below the lighthouse on Nargoe (Naissaar) Island, northwest of Tallinn, at about 2300 hours EET on 22 October 1952. It flashed eastward for 10 or 11 seconds at intervals of three minutes.
- 6. Five or six vessels were executing searchlight exercises about three or five nautical miles southeast of the Helsinki lightship at about 2200 hours EET on 27 October 1952. Their searchlights were just above the waterline and illuminated the surface of the water. No object was observed as a target for the searchlight activity. The vessels were blacked out. The exercise lasted about 15 minutes.

| 1. | Comment: | This destroyer probably was a Modified-O-class craft. | 25 X 1 |
|----|-----------------|--|---------------|
| | The fork-shaped | arrangement at the head of the tripod mast was previously smaller mizzen mast. | 25 X 1 |
